MYCONOS

Myconos, an island of Cyclades, is a spot on earth where perfection seems to compete paradise itself.

A pearly dream-isle between an azure sky and a sapphire sea.

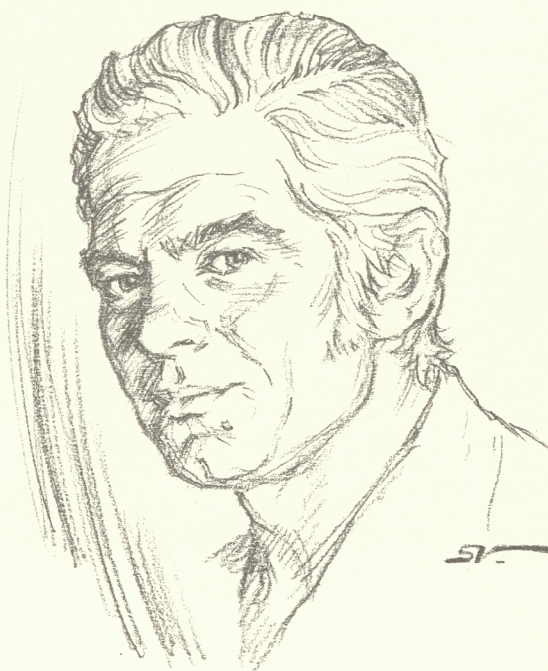

The marvellous sights that a visitor can enjoy, climbing up the various heights, excite the imagination.

Everything on the island is a source of inspiration for the artist.

The sea, the blue sky, the hot sun, the healthy climate, the cooling breeze, the lack of every formality give the isle an unbeaten charm that magic formula which transforms the most uninterested visitor into a lover of the place.
