Dear Peo,

It has been a long time I did not have the opportunity to salute you, you were not there in Athens Conference. However I now have good occasion.

Our Artists Association is having its second Congress on the 4 th of July, in istanbul. We do not have the possibility of inviting any Cypriot delegations of your artists associations but I thought it would be a good occasion to strengthen the feelings of solidarity among artists, if an Artists Association or Union dealing with fine arts, sends us a message of solidarity at our Congress.

It will be very dear for us if you can organize this message of solidarity of the artists of Cypruss.

We are doing fine as far as mutual activities among Greek and Turkish artists. I already invited three greek artists to take part in the Fine Arts Symposium, within the International Art Festival of the City of Antalya. The theme of the Symposium will be "Calling for Peace". And we shall organize mutual painting, drawing and prints exhibitions towards autumn this year.

I am also very happy because now I can write to Kiranova about all these, because she she thinks that all medeterranians have very bright ideas but no deeds.

Hoping to hear from you once in a while, friendly yours

Orhan Taylan

P.S.

The name and the adress of our association is printed above.

Dear Peonnides;

It was very happy to find your card when I returned to my studio after a months trip in Europe.

Every thing built in Warsaw, is beautifully staying alive and growing. I already wrote to Korakas, about the mural painting activity we planned to take place in Athens. I have five painters eager to go there and paint a wall each, to make their work a gift to the working people of Athens. The Theme is "Peace, friendship and solidarity"

How about a group of painters from Limassol? I am expecting to hear from Korakas soon, ~~so~~ so I can write to him about technical details.

We may have the possibility to organize the same type of work in Istanbul before the end of this year.

Don't you have any plans to visit Istanbul this Summer?

The steel "tesbih" you gave me, is the center of envy among my friends. I call it: the symbol of patience and hard work (for democracy and socialism). Wishing you health courage and success in your work,

brotherly yours

Orhan T.
